

**PROCEDURE FOR PERFORMING
INDEPENDENT WORK OF STUDENTS
at the Department of Surgical Dentistry and Oral and Maxillofacial Surgery
in the 2025-2026 academic year**

1. Independent work of students consists of independent study of the issues provided for in the curriculum and included in the "Thematic Plan of Independent Work of Students" for the current semester.
2. As a result of studying the material, the student completes an individual assignment (element): they prepare a separate presentation for each of the questions for independent study in the current semester.
 - The number of slides in the presentation is calculated at **3-5 semantic slides per 1 hour of independent work**.
 - The first slide contains the title of the work, the topic of the independent work from the thematic plan, the name and group number of the student who completed the work. The last slide contains a list of references used.
 - Presentations must be designed according to the brandbook (https://disk.yandex.ru/d/D_WdCXnu0klXGw/Презентации).
 - Presentations made using neural networks are **not accepted**.
 - Other people's presentations (with the name and group on the first slide replaced) are **not accepted**. If someone has already submitted a presentation, then all subsequent presentations that are similar (more than 1/3 of the slides are the same) to other students will not be counted. The date is checked based on the date of upload to the portal.
3. The completed work is submitted for evaluation to the teacher at the penultimate lesson of the cycle, during the control of independent work. The minimum score for which the work can be accepted is 61 points. If the score is lower, the student is encouraged to independently study the topic again.
4. A work that receives a positive assessment (more than 61 points) is converted to pdf format, and the file with the presentation/essay is named "Student's Name_Course_Group_Work_No___" and is posted by the student on the educational portal of VolgSMU in the relevant discipline, in the "Independent Work" section.
5. **The form of the report** on independent work is a screenshot of the page with the completed works uploaded to the portal. The student prints it out and submits it to the teacher at the last lesson of the cycle.

6. Ungraded or uncompleted works are submitted to the teacher for review on the days of work-out. Then, the works that received a positive assessment are uploaded by the student to the portal in the same way, after which the student prints out and submits to the teacher a reporting form (a screenshot of the page with the uploaded and graded works).

Considered at the meeting of the Department for Oral Surgery and Maxillofacial Surgery, protocol of «17» May 2025 y. № 9.

Head of the Department
