Attestation procedure

in the discipline "Innovative technologies in orthopedic dentistry " for students in the year of admission 2021 according to the educational program 31.05.03 Dentistry, orientation (profile) Dentistry (specialty), full-time education for the 2025-2026 academic year

1. General principles of calculating the discipline rating

The discipline rating is an individual assessment of the student's study of the discipline, which consists of a rating for the entire period of study of the discipline (preliminary rating) and an interim assessment rating.

- 2. Calculation of the components of the preliminary rating
- 2.1. General principles

The discipline is studied during one semester (the nineth), therefore, the preliminary rating of the discipline for the entire period of study (RPS) corresponds to the semester rating of the discipline in the second semester. (Rcem):

The semester rating of the discipline is calculated according to the formula:

$$Rcem = (Rtek + Rcpo) / 2 + Rб - Riii$$

где Rтек – текущий рейтинг по дисциплине,

Rcpo – рейтинг самостоятельной работы обучающегося в рамках дисциплины,

Rб – рейтинг бонусов,

Rш – рейтинг штрафов.

2.2. Calculation of the current semester rating

The current semester rating (Rtec) is calculated as the arithmetic average of all the grades received by the student during the semester of studying the discipline when performing the tasks of the current academic performance control, which include the following types of tasks: testing, situational task solving, control work, interview on control issues, assessment of the development of practical skills.

The teacher evaluates the completion of tasks in each seminar-type lesson based on the criteria presented below (Table 1) on a classic 5-point scale, where:

- 2 unsatisfactory;
- 3 satisfactory;
- 4 good;
- 5 excellent.

Table 1

Criteria for the current certification forms used

| | • Уверенность и стабильность выполнения навыка | уверенность и стабильность | отсутствие уверенности при стабильности в целом | неуверенность, повторение ошибок при повторном воспроизведен ии навыка | выполнения навыка |

At the end of the semester, the Rtec is calculated and the calculated value is converted to a 100-point scale according to Table 3.

The absence of current debt is considered to be an Rtek value of more than 61 points.

2.3. Calculation of the student's independent work rating in the semester (Rcro)

The SRO rating in the semester corresponds to the student's assessment for completing the SRO electronic training course in this discipline on the electronic information and educational portal of the Federal State Budgetary Educational Institution of Higher Medical Education of the Ministry of Health of the Russian Federation. One semester of study of the discipline includes the implementation of one e-learning course SRO.

The SRO is evaluated based on the criteria presented below (Table 2) on a classical 5-point scale, where:

- 2 unsatisfactory;
- 3 satisfactory;
- 4 good;
- 5 excellent.

Критерии оценки СРО

| Тип задания | Критерии | | Оценка по 5-ба | алльной шкале | |

| | заданий | | | | |
| | оценочных | | | | |
| | частей ЭУК и | | | | |
| | контрольного | | | | |
| | раздела | | | | |

At the end of each study, the student's Rcro is calculated and its calculated value is converted to a 100-point scale according to Table 3.

The absence of current debt is considered to be an Rrr value of more than 61 points.

2.4. Transfer of the current rating and the SRO rating to the 100-point system

At the end of the semester, the student's current rating and SRO rating, calculated in a 5-point system, are converted to a score based on a 100-point system. The transfer is made according to Table 3.

2.5. Rating of bonuses and penalties

Bonuses and penalties are issued on a 100-point system. The criteria for bonuses and penalties are shown in table 4.

Table 4

Bonuses and penalties by discipline

| Bonuses | Name | Scores |
|-------------------------|---|-------------|
| UIRS Points | Educational and research work on the topics of the subject under study | up to + 5.0 |
| NIRS | RIRS Certificate, diploma, diploma, etc. of the participant of the department's INR | up to + 5.0 |
| Fines | Name | Scores |
| | Skipping lectures or practical classes without a valid reason | -2.0 |
| Disciplinary Points | Failure to complete tasks in practice classes | - 2.0 |
| | Systematic lateness to lectures or practical classes | -1.0 |
| | Violation of safety | -2.0 |
| Causing material damage | Damage to equipment and property | - 2.0 |

3. Calculation of the intermediate assessment rating

The intermediate certification in the discipline is carried out in the form of a test and includes the following types of tasks: testing.

The assessment of the student's level of formation of the necessary competencies is carried out on a 100-point scale according to the criteria in table 5.

Table 5 Criteria for assessing the level of assimilation of the discipline material and the formation of competencies

| Response characteristics | ECTS Assessment | Points in the BRS | The level of competence in discipline |
|---|--------------------|-------------------|---------------------------------------|
| A complete, detailed answer to the research questions is given, and a set of conscious knowledge about an object is shown, manifested in the free operation of concepts, the ability to identify its essential and non-essential features, and cause-and-effect relationships. Knowledge about the object is demonstrated against the background of its understanding in the system of biological science and interdisciplinary connections. The accounting documents are drawn up without comments, their content is formulated in terms of science, presented in literary language, logically, evidently, demonstrates the author's position of the student. The student demonstrates a high advanced level of competence formation. The intermediate certification has been completed. | | 100–96 | Ħ |
| A complete, detailed answer to the research questions is given, the totality of conscious knowledge about the object is shown, the main provisions of the topic are evidently revealed; a clear structure and logical sequence can be traced in the answer, reflecting the essence of the concepts, theories, and phenomena being disclosed. Knowledge about an object is demonstrated against the background of its understanding in the system of this science and interdisciplinary connections. The accounting documents are drawn up without significant comments, presented in literary language in terms of science. There may be errors in the definition of concepts, corrected by the student himself in the process of responding. The student demonstrates a high level of competence formation. The intermediate certification has been completed. | | 95–91 | HICH |
| A complete, detailed answer to the research questions is given, the ability to identify essential and non-essential signs, cause-and-effect relationships is shown. The accounting documents are executed without gross violations. There may be mistakes or minor mistakes that are corrected by the student with the help of the teacher. The student demonstrates an average increased level of competence formation. | С | 90–81 | AGE |
| A complete, detailed answer to the research questions is given, the ability to identify essential and non-essential signs, cause-and-effect relationships is shown. The accounting documents are executed without gross violations. However, minor errors or omissions were made, corrected by the student with the help of "leading" questions from the teacher. The student demonstrates an average sufficient level of competence formation. The intermediate certification has been completed. | D | 80-76 | AVER |

4. Calculation of the final rating for the discipline The final grade in the discipline (Rd) is calculated using the formula:

$$R$$
д = $(R$ предв + R па $)$ / 2

The final score calculated in the 100-point system is transferred to the "credited - not credited" system according to Table 6.
